

FOUR PILLARS. ONE OPERATING SYSTEM FOR RECOVERY.

Synaptic.

A stroke rehabilitation OS that runs on the
lowest device in the room — and still rivals the
clinic.

PREPARED FOR
CLINICAL & GLOBAL HEALTH PARTNERS

DATE
MAY 2026

THE QUIET CRISIS

Rehab works. *Delivery* doesn't.

THE CARE CLIFF — INTENSITY VS. TIME AFTER STROKE

WHERE IT BREAKS

01 Under-dosed

~10x less practice than guidelines

02 Lost to follow-up

60%+ after hospital discharge

03 No real-time signal

clinician sees patient monthly, at best

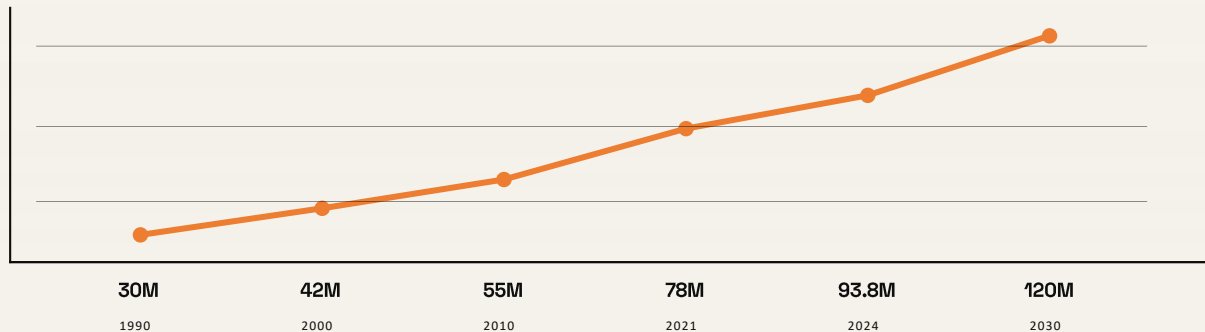

04 CHW has no tool

the only continuous carer flies blind

Stroke is the *second-largest* cause of disability on Earth.

GLOBAL STROKE VICTIMS — 1990 TO 2030 (PROJ.)

SOURCE: GBD / LANCET

RECURRENCE WITHIN 5Y

1 in 4 have another stroke

DISABILITY GAP (HIC vs LMIC)

RIGHT NOW

86 Million

survivors need structured rehab — the great majority will not get it.

CARE + LOST PRODUCTIVITY, WORLDWIDE

Four operators. *One shared screen.*

ADDRESSABLE USER BASE — PROPORTIONAL SCALE

~94M TOTAL — THE PATIENT SEGMENT DWARFS EVERY PROFESSIONAL COHORT

PRIMARY

Clinicians

Manage caseloads, sign-off on AI-drafted notes, escalate from CHW pings.

2.4M

WORLDWIDE

FRONTLINE

Therapists

Run sessions with Cerebrum's hand coach, track Recovr vitals, write plans.

1.8M

WORLDWIDE

REACH

CHWs

Receive Recovr SOS, run Phenome by voice, log home visits in seconds.

3.5M

ACROSS LMICS

THE MISSION

Patients

Wear Recovr. Talk to Phenome. Train with Cerebrum. Recover at home.

86M

NEED REHAB NOW

SYNAPTIC / FOUR PILLARS

One system. *Four products.*

01 Recover.

WEARABLE / VITALS + SOS

A wristband that streams heart rate, SpO₂, and falls — fires an SOS with GPS when vitals crash.

02 Phenome.

VOICE ASSISTANT / AUTOMATION

A multilingual voice layer that drives every action — logging, scheduling, escalation — hands-free.

03 Cerebrum.

HAND-TRAINING AI COACH

Camera-based hand pose tracking that scores every rep, corrects form, and pushes neuroplastic dose.

04 Coach & Notes.

PATIENT + CLINICIAN SURFACES

Rehab Coach for the patient. Clinical Notes auto-drafted for the clinician. One source of truth.

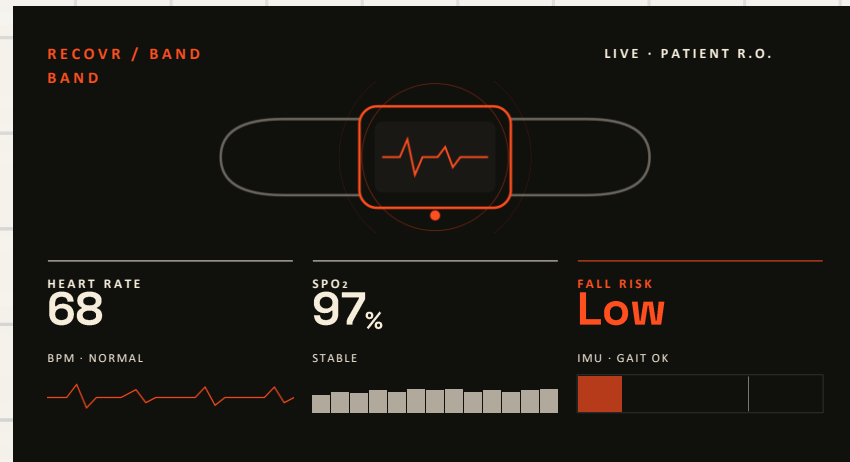

PILLAR 01 — THE BAND

Recover.

A wristband that watches the vitals — and screams for help *before the patient can.*

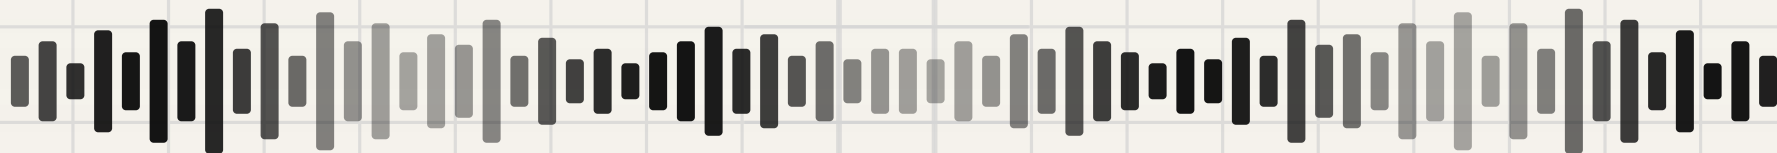

THE SOS LOOP

- | | | |
|----|-----------------|--------------------------------|
| 01 | Sense | HR · SpO2 · Fall |
| 02 | Detect | On-band detection
detection |
| 03 | Locate | GPS + cell triangulation |
| 04 | Dispatch | SMS + app |
| 05 | Confirm | CHW · family · ER |

PILLAR 02 — THE VOICE LAYER

Phenome.

The voice assistant that runs the whole clinic — *log, query, schedule, escalate* — in 12 languages, hands-free.

SAMPLE COMMANDS

“Log R.O. session: 4 sets, 80% accuracy.”

→ NOTE DRAFTED, SENT TO CLINICIAN.

“Kisi marizo akwukwo gosi?” (Igbo)

→ PATIENT ROSTER OPENED, SORTED BY RISK.

“Schedule home visit for tomorrow 10am.”

→ CHW NOTIFIED, SMS SENT.

CLINICAL NOTES

AUTO-DRAFT · CLINICIAN REVIEW

“Pt R.O., Day 42. HR baseline 68, no SpO₂ dips. Cerebrum: form 87% (+12), MCP ROM 62° (+24°). Cerebrum flags plateau risk — +2 sets grip extension, -20% gait drill. Reviewed by S. Adeyemi, PT.”
